3 Module: Document Management

3.1 Use Case

3.2 Use Case Description

Document Management Module provides a platform for various type of contents in different file format (all formats) to be uploaded into the system. It provides options to users whether to create the content directly using the text editor or upload the content file. There are six (6) document category can be choose:

- eNewsletter
- Tender
- Job Vacancy
- Speech
- Announcement
- Event

Text editor included in this module support the What You See Is What You Get (WYSIWYG) feature and have similar functions as the Microsoft Word. The news editor also designed to provision multiple languages and special characters. Multiple selection for delete function will be included as well as filter and sort functions within the system's search feature. Other than that, this module is able to:

- Create, read, update and delete Document

Under module Document Management, privileged user should be able to access the following sub module:

1. Add Document

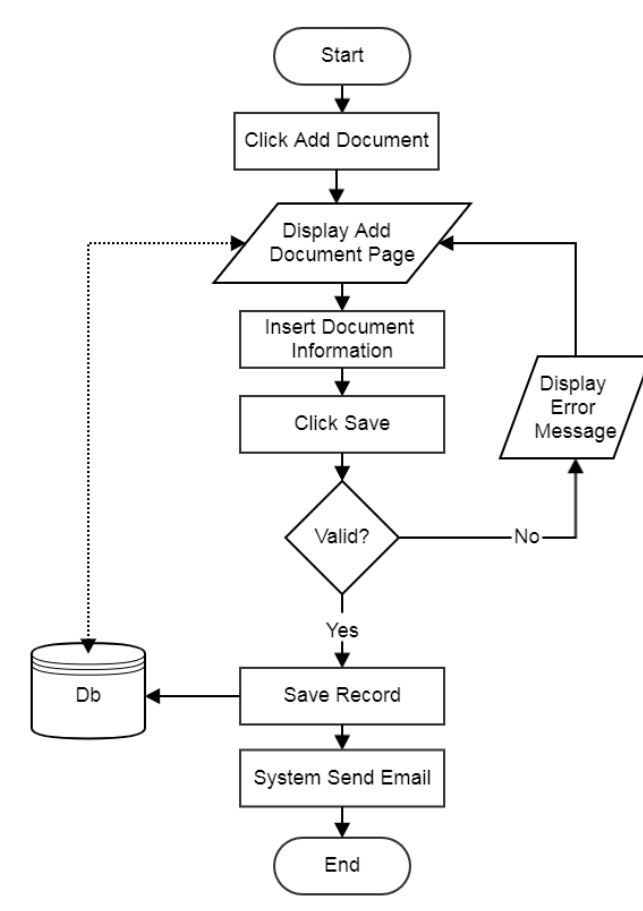

Privileged user and admin shall add new document in this sub module by entering document's information and uploading files or create the content in text editor.

2. Manage Document

In this sub module, privilege user and admin have access to edit, view and delete the document.
